Digital Empowerment

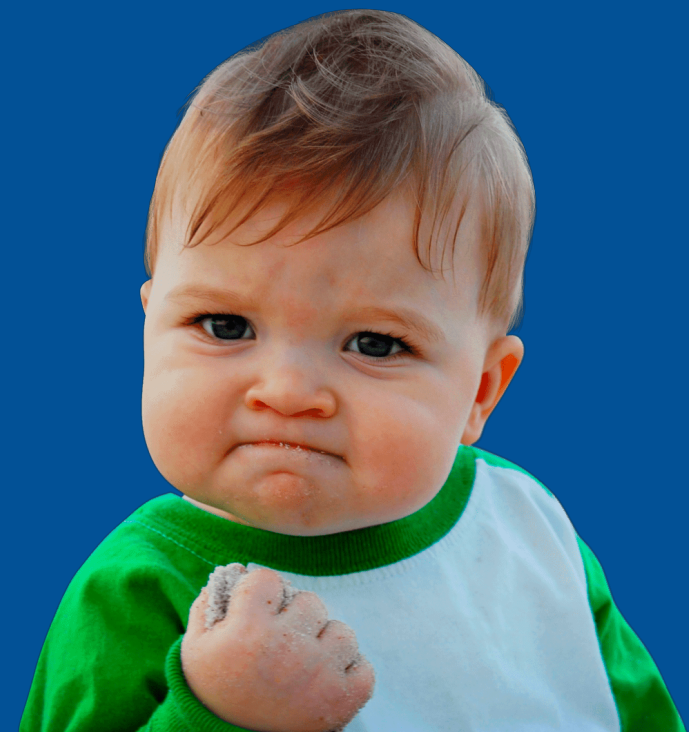

November 4, 2018

# About the project

Full brief at <https://bit.ly/2PIL4Zf>

# Student goals

- Learn to understand an existing codebase in a short period of time
- Get experience working on existing projects
- Get experience working on open-source projects
- Get familiar with the basics of project management with agile
- Become comfortable with reporting about your work and communicating with a team

# Timeline

## November 4 - Kick-off

Project overview, skeleton set-up, module component start

## November 11 - Modules & WYSIWYG

Adding module assets, links, videos, “what you see is what you get” editor

## November 18 - Learning paths

Create, fetch, update and delete learning paths that contain the modules

## November 25 - Authentication

Logging in and securing administrative actions

## December 2 - User management

Create, fetch, update and delete users (and user roles) + emailing

## December 9 - Finishing touches

Project cleanup, documentation, refactoring and finishing touches.

## December 12 - Graduation 🎉

# Continuous evaluation

 Teamwork & Communication

 Technical expertise

## End of project

Certificates

Open Badges for the highly distinguished 🙄

# Teams

Team 1

Hassan

Luay

Paul

Samim

Team 2

Abdou

Mohammed

Wameedh

Team 3
